

B Type Filter Backwash Valve

Technical Advantages

- ✓ Made from reinforced polyamide (PA) material, sturdy and durable.
- ✓ A special molding process is used to enhance the strength of rubber diaphragm and improve abrasion resistance and length of working life.
- ✓ Grooved end connection for easy operation.
- ✓ Simple construction, light weight and extra low faulty goods rate.

Backwash Valve

Principles of Operation

Angle (A) Flow

Straight (S) Flow

Specifications

Model No.	Material	Connection Type (Grooved adaptor connectors)	Gross Weight (Kg)	Installation Dimensions L×H×W	
				(mm)	(Inches)
B220A/S	Reinforced PA	2"×2"×2"	2.9	239×276×160	9.4×10.9×6.3
B330A/S		3"×3"×3"	5.2	288×380×194	11.3×15×7.6

■ Working Pressure: 2 – 8 bar (30 – 115 psi)

■ Working Temperature: 4 - 50 °C (40-140 °F)
