# Garnet

**Garnet** is an ideal water filter media. Garnet is a chemically inert and non-metallic mineral, which is commonly found in the natural environment. Garnet is well known for its hardness and durability. It has a high specific gravity as well as its chemical and abrasive resistance makes garnet an ideal filter media.

### NATURAL PROPERTIES

Appearance	Hard granular cubic sub angular particles
Colour	Light tan to reddish purple
Specific Gravity	3.9 – 4.1
Hardness	7-9
% of wear	<0.5

### AVAILABLE SIZE RANGE

- a) 0.25-0.6mm (30/60#)
- b) 0.42-0.85mm (20/40#)
- c) 0.71-1.7mm (12/25#)
- d) Others size upon special request

### TECHNICAL SUPPORT AND KNOW-HOW

PureGen has high technical competent level and technical service departments are staffed by industry leading specialists in the field of all filter media application.

### PACKAGING

**Garnet** is available in 12.4L/bag (25kg)

Kindly contact our technical department for more product information.

All the stated information in this product is reliable, correct and accurate to the best of our product knowledge at the date of its publication. Due to the progressive of Millennium Carbon that improving the performance of our products continuously, we reserve the right to change product specifications without prior notification. No implied warranty or guarantees of product ability, assumes no obligation or liability for the usage of the information in this datasheet.
